Incubator

Incubator
Incubator

Suitable for users who inquiry good accuracy and good uniformity temperature requirements. The basis of laboratory research units supporting equipment, recommended for intermediate and central laboratory.

Application :

This type of lab incubator apply to such as cultivation of microorganism's industries, the necessary equipment for health care, biotechnology, agriculture and scientific experiments.

Features :

- Precision LCD microcomputer intelligent PID control system, with temperature control, timing and over-temperature alarm.
- With standard international brands cooling fan, maintenance - free, durability. Perfect combination of duct design to ensure temperature uniformity for the working chamber.
- Mirror stainless steel inner, anti-acid, anti-corrosion characteristics.
- Corners semicircular is easy to clean, up and down pitch adjustable shelf.
- Electric film heating elements made of carbon fiber, with advanced cavity preheating, the cavity temperature to reduce temperature fluctuations.
